DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informality. On Page 10, line 23, "above the spring" is recited. It appears that when the hook 12 is away from the pin 10, the axis 13 of the hook 12 is located below the spring, not above the spring. This objection may be obviated by replacing "above" with - -below- -. Appropriate correction is required.

Claim Objections

2. Claims 1, 4, and 7 are objected to because of the following informalities, which appear to be minor draft errors creating grammatical problems.

In the following format (location of objection; suggestion for correction), the following suggestions may obviate their respective objections: (claim 1, line 3, "on the carriage for irradiating X-ray"; replacing "X-ray" with - -X-rays- -), (claim 1, line 10, "released state that the storage box locking means"; inserting - -so- - before "that"), (claim 4, line 3, "in a direction that the hook engages"; inserting - -so- - before "that"), (claim 4, line 4, "in a direction that the hook moves"; inserting - -so- - before "that"), (claim 7, line 3, "in a direction that the hook engages": inserting - -so- - before "that"), and (claim 7, line 4, "urging the hook in a direction that"; inserting - -so- - before "that").

For purposes of examination, the claims have been treated as such. Appropriate correction is required.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the

manner in which the invention was made.

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Morasse (US

Patent 6126314) in view Applicant's admission of prior art (AAPA).

Morasse discloses X-ray equipment comprising a carriage (Fig. 2, #1), an x-ray source on

the carriage (col. 3, lines 1-4), and a cassette storage box pivotally attached to the carriage for

storing a cassette with a radiographic storage medium (Abstract and Fig. 2, #7).

However, Morasse does not disclose storage box locking means engaging a cassette

storage box for locking the cassette storage box in a locked state and locking release holding

means attached to the storage box locking means for holding the storage box locking means in a

released state so that the storage box locking means is released from the locked state.

AAPA teaches storage box locking means engaging a cassette storage box for locking the

cassette storage box in a locked state (Fig. 8, #53 and 54) and locking release holding means

attached to the storage box locking means for holding the storage box locking means in a

released state so that the storage box locking means is released from the locked state (Fig. 8,

#55).

It would have been obvious, to one having ordinary skill in the art at the time the

invention was made, to modify the equipment of Morasse with the storage box locking means

and the locking release holding means of AAPA, since one would be motivated to incorporate

these to better hold the container in place without opening unexpectedly (Figs. 8-10) as implied

from AAPA.

Allowable Subject Matter

4. Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 2, prior art does not disclose or fairly suggest an X-ray equipment including auto-lock switching means attached to storage box locking means for switching the storage box locking means from a released state to a locked state when a cassette storage box is closed, in combination with all the limitations in the claim and base claim. Claims 3-8 contain allowable subject matter by virtue of their dependency.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent 5138160 discloses a storage box (Fig. 5, #48).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chih-Cheng Glen Kao whose telephone number is (571) 272-2492. The examiner can normally be reached on M - F (9 am to 5 pm).

Application/Control Number: 10/673,386

Art Unit: 2882

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ed Glick can be reached on (571) 272-2490. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
